2024-2026 | **Prat Educació**

Multiplatform Application
Development (DAM)

2026 | **Universitat Oberta de Catalunya (UOC)**

Master's in Business Intelligence
and Big Data Analytics

Certifications

- ISTQB® Certified Tester – Automation Engineer
- Project Management – Mondragón University

About Me

Detail-oriented QA Engineer and Software Developer with a strong foundation in quality assurance methodologies (ISTQB Certified). Leveraging my background in development (React, Python) and operations, I specialize in designing test scenarios, executing functional testing, and troubleshooting root causes. Passionate about bridging the gap between engineering and user experience by breaking code constructively to ensure flawless software delivery.

Experience

2024 - Present

Vibbe Labs

- Design & Automation: Created test cases and scripts to validate web application functionality.
- Defect Management (Bug Tracking): Agile detection, reporting, and resolution of incidents in production environments.
- Quality Assurance (QA): Applied ISTQB standards to validate code prior to deployment, ensuring maximum reliability.

2026

Operational Excellence | Cofidis

- Quality Control (QA): Executed audits of operational processes and validated data to ensure system stability and accuracy in information management.
- Incident Management: Triaged, tracked, and resolved operational incidents, identifying bottlenecks to improve team response times.
- Task Automation: Developed macros and automated processes for mass data analysis and ticket assignment, significantly reducing human error.
